In the Claims

Please amend claims as follows.

7. (Amended) A method for controlling the presentation of at least one calendar on a display of a portable data storage module comprising the operations of:

depicting at least one calendar on a display of a portable data storage module, the display situated on a top face of the portable data storage module;

depicting a plurality of icons each corresponding to increments of time selected from the group of increments of time including hours, days, and weeks;

allowing the selection of one of the icons; and

dividing the at least one calendar into increments of time corresponding to one of the icons that is selected.

11. (Amended) A method for controlling the presentation of a plurality of calendars on a display of a portable data storage module comprising the operations of:

providing a window on a display of a portable data storage module which identifies each of the calendars, the display situated on a top face of the portable data storage module;

allowing the selection of the identified calendars displayed in the window; and

simultaneously displaying all of the selected calendars.

18. (Amended) A method for controlling the presentation of a plurality of calendars on a display of a portable data storage module comprising the operations of:

depicting a plurality of calendars simultaneously on a display of a portable data storage module, the display situated on a top face of the portable data storage module, wherein each calendar is divided into sections corresponding to increments of time and scheduled matters are depicted in the sections; and

altering a size of the sections as a function of a number of the calendars simultaneously depicted.

20. (Amended) A method for controlling the presentation of a plurality of calendars on a display of a portable data storage module comprising the operations of:

depicting a plurality of calendars with scheduled matters on a display of a portable data storage module, the display situated on a top face of the portable data storage module; and

allowing movement of the scheduled matter of one of the calendars to another one of the calendars.

22. (Amended) A method for simultaneously depicting multiple calendars on a display of a portable data storage module comprising the operations of:

providing a plurality of calendar databases each including a calendar having a plurality of scheduled matters;

providing a common database including a plurality of identification data sets each corresponding to the calendar of one of the calendar databases, the identification data sets each including attributes corresponding to the calendar database; and

displaying the calendars of the calendar databases on a top face of the portable data storage module in accordance with the attributes.

REMARKS

The Specification is amended herein to update the Related Application data. Claims 7, 8, 18, 20 and 22 are amended. No new matter is introduced by any of the amendments, and entry thereof is requested. Claims 1 - 27 are in the application. Reconsideration of the application, as amended, is requested.

Objection to the Specification

The Examiner objected to informalities in the disclosure in that on page 1, the U.S. serial numbers and current status should be included for the related applications. Applicant has amended the specification to include the serial numbers of the related applications. All related applications mentioned in the specification are currently co-pending as indicated on page 1, line 10 of the current application. Applicant submits the specification is now in condition to overcome this objection and the objection can now be withdrawn.
